 574-606-9990

 Austin, TX

## Front End

HTML5  
CSS / Sass / Less  
Javascript  
(ES2018)  
React  
Styled  
Components

Redux  
Next.js  
Apollo / GraphQL  
D3  
React Native  
Webpack, Babel  
Rollup, Parcel  
Prettier  
Typescript  
RxJS  
Angular  
Vue  
Gatsby  
Preact  
Reason

## Design

Sketch  
Invision  
Illustrator  
Framer  
Photoshop

## Testing

Jest  
React Testing  
Library  
Mocha, Jasmine  
Cypress

## Back End

Express  
Node  
Prisma  
UNIX, Bash  
MongoDB

## Dev Ops

Git  
CI / CD  
AWS  
Serverless  
Docker  
Kubernetes

## Etc

VSCode / Vim  
Agile / Scrum  
Google Tag  
Manager

Web Typography  
SEO  
Photography  
Internationalization  
Color Theory  
TensorFlow

## Summary

Jared Hanstra is a full stack engineer with a focus on front end technologies and architecture. He enjoys staying up to date with the latest web technologies and continually refining the art of web development and design.

## Work Experience

Jul. 2017 -  
Present

**Senior Front End Developer**  
Accenture Interactive

Developed a data-intensive web application for drilling engineers to visualize and estimate the cost of new oil wells - React, D3, Redux, Styled Components  
Created a dashboard for a major financial services provider to view investment data and financial projections - React, D3, Redux, RxJS, Styled Components  
Developed a website for small business owners to understand their business risks and purchase insurance - React, Typescript, Redux, RxJS, Material UI  
Collaborated in an agile team environment with other front-end and back-end developers, designers, project managers, and QA engineers. Presented demos to client stakeholders

Jun. 2016 -  
Jul. 2017

**Shopify Developer**  
Fuel Made

Built and maintained custom e-commerce websites using Shopify, Liquid, Javascript, HTML, and CSS  
Worked in a remote environment with a small agile team

Jul. 2014 -  
Mar. 2016

**Front End Developer**  
University of Wisconsin-Madison

Designed and developed the front end of the new MyUW student portal - Angular.js, Less, Java, HTML, CSS  
Developed a UW style guide on top of Bootstrap for MyUW and other UW projects

2013 -  
Present

**Personal Projects**

Snipster - command line program to manage text editor snippets  
Concept - Reusable UI component library for React, Next.js, and Styled Components (in progress)  
Axiom - file generator for new projects, similar to Yeoman (in progress)  
Moonbot - Node program that scans for news about cryptocurrencies and makes trades based on the news

## Education

Aug. 2009 -  
May 2013

**University of Notre Dame**  
College of Science, Bachelor of Science  
Mathematics  
GPA - 3.28
